#### The COVID Problem

Identified in Wuhan, China in December 2019. Caused by the severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2).

In the United States alone, we currently have

- **37.768.911** total cases
- **626.833** total deaths

#### The COVID Problem

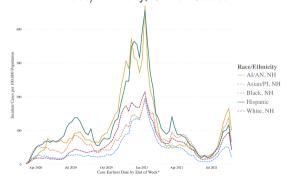

Transmission by exposure to infectious respiratory fluids:

- 1. Inhalation of virus
- 2. Deposition of virus on exposed mucus membranes
- 3. Touching mucous membranes with soiled hands contaminated with virus

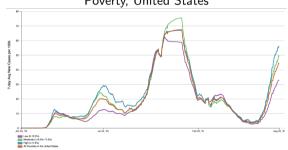

### The COVID Problem

COVID-19 Weekly Cases per 100,000 Population by Race/Ethnicity, United States

## COVID-19 Weekly Case Rate per 100,000 Population by Percentage of County Population in Poverty, United States
